Disclaimer

This whitepaper will be continuously updated as the community grows, the NFT marketplace takes shape and the game development progresses. Once we are ready to launch the first alpha release, we will share a wiki page where everything will be explained further and how you can acquire your free NFT with our JoJo Inu exclusive NFT airdrop.

Updates of the whitepaper will be announced on Telegram and Twitter.

Introduction

JoJo Inu was born from the idea of true community focus where we can shape the future of NFTs. JoJo Inu will change the way NFTs are viewed and will enable the crypto community to realize we haven't even scratched the surface of what's possible in this new world. That is what JoJo is all about. What powers our Stands is our JoJo token, which was built on Ethereum blockchain, ERC-20, with smart code that makes it safe to invest and rewards you to hold. JoJo Inu has been well received in the crypto community and we are here to grow and make an impact on how NFTs will be viewed and used in the future.

Goal

Crypto and NFTs are still relatively new. We are at the forefront of it all happening and while we don't even realize it yet, we are writing history. That's why JoJo Inu wants to shape the future of this new world. We have a strict roadmap that we want to achieve. And obviously, we don't want to let down our backers, supporters, and fans. Thanks to the incredible community that makes JoJo Inu what it is today, we are able to give our token and NFTs utility, while shaping the future. Hence, exclusively for JoJo Inu holders, the team will airdrop NFTs that can be used on our NFT marketplace and in the JoJo Inu game.

**THE
FUTURE
IS HERE**

JOJO INU.COM
T.ME/JOJOINU

Goals:

- Grow an active community that can provide us with feedback and help us shape the future of NFTs.
- Build and create a new revolutionary NFT marketplace from scratch as the crypto market hasn't seen yet. Which is visually attractive and at the same time is designed with the user experience in mind.
- Create an NFT generator that will create NFTs with different kinds of rarities. This will make some of the NFTs common, while others might be super rare
- NFTs can be traded, but also used in the game.
- Give utility to the minted NFTs and be able to actually use them.

JoJo Tokenomics

100,000,000,000,000,000 JOJO minted

50% burned on launch

50% in circulation

2% reflections on every transaction (buy & sell)

As the burn wallet also receives reflections, the circulating supply will decrease slowly with every transaction.

Roadmap

Part 1 Phantom Blood

- Token fair launch
- 1000+ holders
- Listing on coinmarketcap
- Listing on coingecko
- Release whitepaper
- 2000 Telegram members
- 10M+ market cap

Part 3 Stardust Crusaders

- Listing on exchanges
- 10.000+ holders
- 20.000 Telegram members
- NFT market beta program
- NFT creation
- 50M+ market cap

Part 2 Battle Tendency

- Marketing campaign
- 3000+ holders
- 5000 Telegram members
- Preview NFT market
- Early preview of NFT game
- Expand team
- 25M+ market cap

Part 4 Diamond Is Unbreakable

- Release NFT market
- 30.000+ holders
- 50.000 Telegram members
- Beta release NFT game
- NFT drops to holders
- 100M+ market cap

The NFTs

Nowadays most of the NFTs out there don't have real utility. We want to change that.

That's why we want to be able to use the NFTs in the game that we are creating, and holders will also be able to trade their NFTs.

The NFTs might represent playable characters, powerups, health potions, rare items, weapons or any type of mechanic that can help you out in the game. The NFTs will have a rarity which will determine how powerful and rare the NFT is.

The game

We are building a 2D platform game that utilizes the JoJo NFTs in-game. To play the game you will need to be holding a certain amount of JoJo tokens. The game will be play-to-earn, meaning you could win more JoJo tokens as you play. We will set up a global leaderboard as well so you can keep track of how you are competing with your fellow holders. There will be several playable characters, some of which will be airdropped, others need to be minted or bought on the marketplace.

As we are just getting started, we will share the progress of the game and NFTs on our socials, so keep an eye out for this!

Great to have you onboard
